BACKGROUND AND RATIONALE

Chiang Mai University School of Public Policy (CMU-SPP) is a public policy school, concurrently operating as a cutting-edge research and consulting organization, committed to solving complex and wicked public problems with inclusive, innovative, progressive, and sustainable policy solutions. The School was setup based on the idea that we need to tackle complex and wicked problems that are of public nature by not relying on only certain disciplines but rather by using multiple disciplines to define the problems and think of the solutions to these problems.

SPP, offering academic degree programs at the Master and PhD levels, is propelled by the notion that civic and civil challenges must be confronted by not solely relying on fixed disciplines; rather, multiple branches of knowledge should be employed for decoding the roots of problems and cultivating effective solutions. What is unique about our curriculum is that it focuses distinctively on big data analysis (quantitative) and policy communication (qualitative) aspects of policy analysis. While drawing faculty members from over 10 departments across the university: Engineering, Business and Administration, Commerce, Economics, Architecture, Political Science, Social Science, Geography, Pharmaceutical, Public Health, and Science.

The foundational essence supporting this topical issues based platform is that our research work is not merely about crafting concepts and theories. Our products concentrate on tangibly influencing public policies in ways that generate practical implications for changing the laws, issuing new regulatory systems, and crafting incentives that encourage behaviors which holistically serve the public good.

SPP is one of few public policy schools explicitly operating within the framework of the 2030 United Nations Agenda for Sustainable Development. This Agenda includes seventeen sustainable development goals (SDGs), addressing everything from poverty to climate action. While all policy schools selectively focus on SDGs, SPP's research work and training emphasizes peace and justice that is backed by strong and non-discriminatory institutions.

Pursuing Postgraduate Programs at Chiang Mai University School of Public Policy

Choosing whether and where to pursue advanced academic degree is a significant and weighty life decision. People do this for different reasons. A Master's Degree is generally sought as a means of framing and credentialing accumulated life experience and then leveling-up one's professional positioning and salary. A PhD, while career-advancing, is about pinpoint developing a topic of keen interest, perhaps even fulfilling one's higher purpose.

Regardless of need or motivation, a multitude of logistical aspects must be considered when selecting an academic program. Perhaps most important is to what degree has the academic faculty engineered its program in-terms of furnishing the knowledge and resources required for students to meet their goals. We at Chiang Mai University School of Public Policy (CMU-SPP) well understand this dynamic. While SPP's public policy degree programs at the Master and PhD levels vary, our interdisciplinary team of practitioners and academics is committed to tailoring a track that is most suitable for those who are interested in enrolling in our programs.

It is noteworthy that a truly unique aspect of SPP's program is that while we, alike other public policy schools, teach fundamentals of politics, public administration, economics, and social science based theories, SPP uniquely blends society-based qualitative and science-supported quantitative methodology. Focused on deliberative processes, we additionally educate students about governance-based negotiation processes. This is while exposing them to the social narratives connected with the root issues, and the actors, of development phenomena and their linked public problems.

SPP acknowledges that policies design is not just about crafting the best or soundest policies. We question how are the societal narratives integrated into the policy. This pertains to the language of public policy, which involves awareness of the influence and leverage of language, mindfulness regarding the layered power structures inside languages, and insight into how policies branding makes a difference in strategy effectiveness. Politicians, campaigners, activists, and others working with the public need to know

about this, particularly considering that storytelling to different societal contexts requires different language levels.

SPP's students grow toward an acquired capacity for seeing critically beyond known facts. They acquire comprehension about the inter-linkages of deep-rooted public problems and how we are all part of this global dynamic. Infused with empathetic deliberation skills necessary for discussing complex public issues, they become professional *pracademics*. Graduates move forward in life equipped with insight into and mastery about how sound public policies can be utilized for inclusive, innovative, progressive, and sustainable solutions to the most prominent public problems.

Academic Excellence and Progressive Environment

School of Public Policy is situated in a very livable city of Chiang Mai that is within 3 hours of flying distance from major cities in the mainland Southeast Asia region. The School is situated 700 km. (435 miles) north of Bangkok, at Thailand's second capital city of Chiang Mai. Aside the Lee Kuan Yew School of Public Policy in Singapore, CMU-SPP is the only autonomous School of Public Policy in ASEAN that offers international degrees for Master and PhD in Public Policy. SPP considers this locale, dynamically comprised of ancient and modern paradigms, an 'urban lab' for comprehending the melting pot of worldwide urbanization phenomena that are also ensuing throughout Asia's secondary (non-mega) cities.

SPP is offering this urban learning classroom to its students. While observing the marvels transpiring in this region, they are exposed to the root issues, and the actors, connected with this diversified spectrum of development phenomena. We are not pitching SPP by saying it is located in "the developing world" and therefore is a place for learning specifically about this. SPP is not promoting a Thailand perspective, or even the Southeast Asia standpoint. An urban problem is an urban problem. An education problem is an education problem. Inequality is inequality, regardless of country or nationality. We are advocating for the emergence of a global perspective.

Chiang Mai, and therefore SPP, is a place for debating all perspectives. We are hence integrating into our team those who are open-minded enough to transform their mindsets and worldview, in ways that can also be extrapolated and applied elsewhere.

The School is located at the Northern Science Park Chiang Mai (NSP-Chiang Mai), one of three regional science parks in Thailand. It benefits from modern facilities with reliable internet connection and public spaces ranging from Receptions, Conference room, Classrooms, Auditorium, Exhibition Hall, Co-Working Space, Security System, Elevators, Food Hall, Coffee Shops, Mini mart, and Parking Area. Northern Science Park has been operated by STeP and other six networked-universities in Northern Thailand since 2013 under the support from Ministry of Science and Technology's Science Park Promotion Agency. Such environment has stimulated the creation of new technology businesses and become the linkage to build the ecosystem to promote innovation development between academic, government and private sector.

OBJECTIVES OF SPP GRADUATE PROGRAMS

- Offering a practical academic degree program at the Master level that teach fundamentals of politics, public administration, economics, and social science based theories while uniquely blend society-based qualitative and science-supported quantitative methodology.
- Training scholars and practitioners in skills related to public policy including policy-making, policy analysis, policy communication, and policy advocacy. Focused on deliberative processes, we educate about governance-based negotiation processes while exposing them to the social narratives connected with the root issues, and the actors, of development phenomena and their linked public problems.
- Production of public policy specialists that are nationally and internationally recognized who generate top quality research products and platforms, with cross-disciplinary approach founded on reliable information that enhance public policy decisions.
- For students to acquire the capacity for seeing critically beyond known facts with comprehension about the inter-linkages of deep-rooted public problems and global dynamic.

Infused with empathetic deliberation skills necessary for discussing complex public issues, they become professional practitioners.

- For graduates to move forward in life equipped with insight into and mastery about how sound public policies can be utilized for inclusive, innovative, progressive, and sustainable solutions to the most prominent public problems.
- CMU-SPP aims to build core competencies of our scholars, staffs, and students in accordance to guidelines by the National Association of Schools of Public Affairs & Administration (NASPAA), in which we seek international accreditation. The competencies are as follows;
 - Lead & Manage in Public Governance - The ability to lead and manage in public governance: energize people, mobilize resources in the pursuit of publicly defined policy goals.
 - Participate in & Contribute to the Policy Process - Participation in and contribution to the policy process: participate substantively in the design, implementation, and evaluation of public policy.
 - Analyze, synthesize, think critically, solve problems, and make decisions - The ability to analyze, synthesize, think critically, solve problems and make decisions: contribute ethically to decision-making through appropriate use of evidence that recognizes stakeholders' competing values.
 - Articulate and apply a public service perspective - The ability to articulate and apply a public service perspective: demonstrate a commitment to improving social welfare and social justice.
 - Communicate & Interact Productively with a diverse and changing workforce and citizenry - The ability to communicate and interact productively with a diverse and changing workforce and citizenry: professionally represent one's organization to stakeholders orally & in writing.

COURSE SYNOPSIS AND METHODOLOGY

a. Study plan

Master of Arts in Public Policy is a 36-credit program, consisting of five compulsory courses with focus areas including governance, urban policy, environmental policy, and climate change. The program is structured to be completed within 1 year, with additional one year grace period. Course works and academic activities provide training in critical thinking, public policy analysis, design thinking, and futures thinking.

Students can choose between one of the two plans; Plan A Type A2 is Coursework and a Thesis, or Plan B is Coursework and Independent Study. However, students are recommended to enroll in Plan B for ‘pracademic’ learning objectives. Those who are determined to pursue a PhD program, he/she may seek recommendation from SPP Graduate Committee following comprehensive examination to enroll in the Plan A Type A2 (Thesis track). In terms of specialization, student can choose a focus-track in ‘Urban Policy,’ ‘Environmental, Energy, and Climate Policy,’ or ‘Digital Society and Governance Policy’

Requirement for Graduation:

At the final semester that the student is going to fulfill all courses and conditions specified in the curriculum, the student must report him/her self to the registration office for graduation expectation, endorsed by general advisor or thesis major advisor, then also report to the affiliated academic sector. Student who is nominated for graduation a degree or diploma must fulfill all the following conditions

1. Having studied courses and fulfilled all the conditions specified in the curriculum.
2. Having received grade point average of all courses at least 3.00 and grade point average of courses in specific field at least 3.00, except program with dissertation or master’s thesis only.
3. Having passed a foreign language conditions by examination or any other methods specified by the graduate school
4. Having passed comprehensive examination, for type 3 and type 4 master’s student and for the program that has specified.
5. Having passed thesis evaluation examination. The dissertation (doctoral program) must be composed in English language or any other language approved by the graduate school, as the individual case may be.
6. Thesis result must be published or at least accepted to publish in a journal, media, printed matter, or registered a petty patent or patent, or in other forms accepted by the field of study with the approval of the graduate school for each level and/or type of study.
7. Having qualifications complying with the university regulation on student’s honor and glory determination to graduate a degree or diploma of the university.

8. Being honest and faithful with morality and ethics, by righteously and legally creation of work based on facts without any biasing, making up or false data, violating rights, stealing, copying, imitating or repeating (plagiarizing) works of the others.

C. Non-credit Courses

1. Graduate School requirement

a foreign language

2. Program requirement

None

D. Academic Activities

At least 1 independent study work or part of independent study work must be published in CMU Graduate Journal or in other academic publication approved by the field of study and the graduate school with the student as the first author, which can be policy report or white paper.

E. Comprehensive Examination

Having submitted a request form to the Graduate School, approved by general advisor, students must then complete a comprehensive examination.

b. Course Content

| Course Code | Course Description |
|-------------------------|--|
| Required Courses | |
| 950701 | <p>Public Policy and Governance</p> <p>The importance of public policy, Introduction to wicked & complex problems, Problem identification and framing a scope. Public policy processes in theory and reality, Decision-making processes for policy-makers. Policy design and branding, Policy eco-systems and subsystems, Political implications in public policy, Stakeholder analysis and management, Policy management and administration. Sustainable development goals and public policy</p> |
| 950702 | <p>Economics for Policy Analysis</p> <p>Introduction to Economics and Public Policy, Development Economics and growth policy. Behavioral Economics for public policy. Economics of governance. Fiscal and monetary policy. Economic recession and financial crisis. Project feasibility and project evaluation. Economic impact assessment</p> |
| 950703 | <p>Research Design and Methods for Public Policy</p> <p>Nature of applied science and public policy, Designing social research. Research questions and purposes, Strategies for answering research questions. Concepts, theories, hypotheses, models. Literature reviews. Sources and selection of data. Data collection techniques, Data analysis</p> |

| | |
|---------------------------|---|
| | <p>techniques, Research validity, reliability, and ethics, Writing up research.</p> <p>Sample research designs in public policy</p> |
| 950704 | <p>Decision Support System and Data Analytics for Public Policy</p> <p>Introduction to Decision Support System and Data Analytic, Decision Making Theory, Decision Support System with Spread Sheet, Multi Criteria Decision Making (MCDM) in Public Policy: Analytic hierarchy process. Data Analytic and Intelligence System, Advanced Intelligent Systems and Guest Lecture: The case of People Express</p> |
| 950705 | <p>Policy Narratives, Negotiation and Communication</p> <p>Introduction to policy narratives. Role of policy narratives in policy processes. Public policy and discourse analysis, Politics of policy narratives, The strategic use of policy narratives in practice, Public policy and negotiations. Public policy and negotiations in practice. Policy communication and branding. Policy communication in the era of information technology</p> |
| Elective Courses | |
| Urban Policy Track | |
| 950711 | <p>Fundamentals in Urban Studies under Global Perspective</p> <p>Introduction: the brief history of urban studies. The fundamental concepts: from technical to multidisciplinary. The recent issues in urban studies. The new urban crisis and opportunities. Classic case studies</p> |

| | |
|--------|---|
| 950712 | <p>Urban Planning and Design for Policy Makers</p> <p>Introduction to Urban Planning and Design, and Planner and Designer Roles, Urban Definition, Human Settlements, Urban Origins, Urban Evolution, Urban Culture and Society, Urban Quality of Life in Urban design, Public Space and Public Life, Cities in the Global Context, Global Cities, Global Economy and Localism, History of Planning, Models of Planning, Planning Types and Styles of Planning, Conflict of Interest, Priorities, Debates in Planning, Planning Process, Levels of Planning and Locational Theory, Planning into Practice and Implementation</p> |
| 950713 | <p>Urban Habitation and Housing Policy</p> <p>Housing Definition, its role and stakeholders, Housing as driver of urbanization and shaper of neighborhood. Slum and intervention into housing, Housing and discrimination. Trends shaping housing, Planning and policy interventions: community land trust, inclusionary zoning, creating diverse communities, and new urbanism. Demographic shifts, mismatches housing supply, deficient resources, and climate change</p> |
| 950714 | <p>Sustainable Urban Management and Governance</p> <p>Course introduction to Sustainable Urban Management and Governance, Project and Process Management for Urban Development Theory and Practices, Sustainable urban development Concept and Practices, Different indicators of sustainability in evaluations of urban development projects, Elaborate and motivate forms of collaboration between important stakeholders for the development of sustainable solutions in</p> |

| | |
|--------|--|
| | the urban environment, Knowledge and arguments associated with the subject matter in dialogue with various parties |
| 950715 | <p>Sustainable Cities</p> <p>Study of relationship between Sustainable Components and Urban Development, Typology of Urban Development, Urban Architecture and cultural Landscape, Contemporary Urban Architecture and City Development, Sustainable Concepts, Strategies, and Guidelines for Urban Development, Land Use and Transportation Planning, New Urbanism and Smart Growth, Transit Oriented Development and Transit Design, Implementation of Design concepts for Sustainable Cities</p> |
| 950716 | <p>Urban System and Techniques for Policy Makers</p> <p>Introduction to System and Complexity: Walking and watching cities. Social System Dynamics: Population and Economic, and City growth and urban models, Physical System Dynamics: Water, Transport, Energy, etc., Scenarios and scenario analysis: Game theory, simulation, and complex behaviors</p> |
| 950717 | <p>Cities Sports and Tourism</p> <p>City and the World today, City life. Traveling, and AAobilities, The City as a Special Place, Sports and Urban Life, Sports, Public Place, and City Revitalization, Arts in the City, Museum and Tourism, Neighborhoods, Communities, and Suburbanization, City dwellers, Travelers, and the Tourists in Global city, Sports, Tourism and City Development in the Global Age</p> |

| | |
|--|--|
| Environmental, Energy, and Climate Policy Track | |
| 950721 | <p>Environmental Policy</p> <p>Introduction to Environmental Politics and Policy, History of Global Environmental Change, Environmental Impact of human Activity, Seminar on Global Environmental Change and Case study, Institutional Setting of Environmental Policy, Air Pollution and Policy, Water Pollution and Policy, Ground Pollution and Policy, Biodiversity and Forest Conservation, Seminar on Pollution Control and Environmental Conservation, Environmental Law and Institution, Environmental Economic Tools, Environmental Risk Assessment, Comparing Environment Policymaking around the World, Energy and Environment</p> |
| 950722 | <p>Global Climate Policy</p> <p>Introduction to Climate Change and Its Relationship with Science and Society, The Emergence and Politicization of Climate Science, Institutionalization and Governance of Climate, Economic and Development Challenges of Climate Change, Lay Worldviews, perceptions and knowledges of Climate Change, Media Reporting of Climate Change, The Future Roles of Climate Experts, Institutions and the Public</p> |

| | |
|--------|---|
| 950723 | <p>Climate Mitigation and Adaptation Policy</p> <p>Climate Mitigation Policy: History and Our Scenarios, Emission Trading Scheme - Cap and Trade Approach, Greenhouse Gas and Carbon Accounting, Climate Mitigation Program and Urban Development, Examples - Reducing emissions from deforestation and forest degradation, Carbon Tax Scheme, and nationally determined contributions (NDCs), Carbon Market and Finance Workshop, Conceptual History and Policy Framework of Climate Adaptation, Adaptation, Vulnerability, Disaster Risk Reduction, Resilience and Transformation, Mainstreaming Climate Adaptation in Development, Overcoming Barriers to Adaptation: Thresholds, Values and Governance, Workshop and Presentation: Designing Policy for a Low Carbon and Resilient Community</p> |
| 950724 | <p>Energy Policy</p> <p>Introduction Energy system and development. Imbalance resource allocation. Energy supply. Energy demand. Energy markets. Securing energy system and policy measures. Policy and planning of energy efficiency and conservation. Assessing energy policy</p> |
| 950725 | <p>Natural Resource Management</p> <p>Historical / current issues and practices, Soils, Water, Basic ecological principles, Forest ecology and management. Coastal ecology and management. Global change biology. Wildlife ecology and management. Ecosystem goods and services</p> |

| | |
|---|--|
| 950726 | <p>Natural Disaster Management</p> <p>Concepts of natural disasters and these multiple related causes and impacts. Concepts of integrated natural disaster management. Principle and process of natural disaster management. Analyses of potentials and limitation of natural disaster monument from Thai cases. Synthesis from cases studies for natural disaster management policies at national to community</p> |
| <p>Digital and Governance Policy Track</p> | |
| 950731 | <p>E-Governance</p> <p>An overview of e-Governance, Roles of ICT in good governance. Benefits of e-Governance, Types of e-Governance, Models of e-Governance, Social media and governance. Policy framework for facilitating in e-Governance, Current issues and trends in e-Governance, Case studies of e-Governance in practices</p> |
| 950732 | <p>Digital Society and Governance</p> <p>Overview of digital society, Internet of things in the networked world. Roles of big data in society, Smart city development, Privacy and digital society, Theorising digital society. Current issues and trends of digital society, Case studies of digital society practices</p> |

| | |

Health Insurance:

CMU requires that every international student residing in Thailand to purchase a health insurance covering the whole period of their studies, if they haven't got one already. SPP staffs, we will assist you find a good value package of health insurance. The package that we will offer to SPP students require you to pay the annual premium based on student's age.

Student will be responsible for paying the costs of the following items

1. Financial resources for living expenses, based on your personal needs. Please also refer to the breakdown of expected costs, [Read \(https://www.numbeo.com/cost-of-living/in/Chiang-Mai\)](https://www.numbeo.com/cost-of-living/in/Chiang-Mai), and details of in-campus and off-campus accommodation in the next section of this Handbook.
2. All your travel-related costs (and visa) and expenses incurred before your arrival at SPP.
3. Student Enrollment Fee, as of academic year 2019, it is included in the Tuition Fee. The Student Enrollment Fee covers institutional costs related to: maintaining the student status in the university's database systems, reporting required by Thai law, information technology services and financial services. The Fee entitles students to use computer labs, email and Internet access, and contributes to university residential life programs, student activities, and the activities of the Student Union.
4. Application Fee is incurred for those who are accepted at the rate of 900 Baht per application.

**Foreign applicants will be exempted for registration fee ([Read](#))*

<http://admission.grad.cmu.ac.th/admissions/indexeng.php?p=101&tab=5>

Scholarship Eligibility:

Students may apply for financial supports from CMU and/or SPP within the deadlines.

1. CMU Presidential Scholarship (Two round of application, Announce end of April 2020):

You may be eligible to apply for the [CMU Presidential Scholarship](#). The scholarship requires excellent academic performance as demonstrated by a minimum of 3.50 GPA of 4.00 grading system in the Bachelor degree level and the submission of Certificate of English Language Proficiency, TOEFL or IELTS

only. (IELTS scores of 6.0 or equivalent, TOEFL scores of 550 (paper-based) or 183 (computer-based) or 79 (internet-based). Details of funding is provided in the attachment. Upon successful application; you will be informed of the result by the CMU Selection Committee by end of April. SPP will contact you, should there be any request for more documentation.
